

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1-7. (Cancelled)

8. (Currently Amended) A method of selling a vehicle that includes one of a plurality of available passive suspension options using an adjustable active suspension module, comprising the steps of:

(A) informing a customer of at least some of the plurality of available passive suspension options;

(B) adjusting the adjustable active suspension module to perform as a first one of the plurality of available passive suspension options;

(C) permitting the customer to sample the first one of the plurality of available passive suspension options;

(D) adjusting the adjustable active suspension module to perform as at least one other of the plurality of available passive suspension options; and

(E) permitting the customer to sample the at least one other available passive suspension option.

9. (Previously Presented) The method of claim 8, including determining the customer's choice for ordering a vehicle and specifying a chosen one of the available passive suspension options to be included with the vehicle.

10. (Previously Presented) The method of claim 8, wherein the adjustable active suspension module is supported on a demonstration vehicle and steps (B) through (E) are performed using the demonstration vehicle.

11. (Previously Presented) The method of claim 8, including determining a customer profile and making a recommendation of one of the available passive suspension options based upon the customer profile.

12. (Previously Presented) The method of claim 8, wherein step (B) includes setting parameters of the adjustable active suspension module so that the adjustable active suspension module performs like the first one of the plurality of available passive suspension options.

13. (Previously Presented) The method of claim 8, wherein steps (C) and (E) include permitting the customer to ride in a demonstration vehicle that includes the adjustable active suspension module.

14. (Previously Presented) The method of claim 8, wherein steps (C) and (E) include permitting the customer to drive a demonstration vehicle that includes the adjustable active suspension module.

15. (Previously Presented) A method of selling at least one type of vehicle that has a plurality of available passive suspension options, comprising the steps of:

providing a demonstration vehicle that has an adjustable active suspension module;

permitting a customer to ride in the demonstration vehicle; and

adjusting the active suspension module such that the active suspension module performs in a manner that corresponds to a performance of at least one of the plurality of available passive suspension options.

16. (Previously Presented) The method of claim 15, including adjusting the adjustable active suspension module to correspond to at least one other of the plurality of available passive suspension options.

17. (Previously Presented) The method of claim 15, including permitting the customer to drive the demonstration vehicle.
